CACI Treatments

CACI Non-surgical face lift

This micro current system is the most advanced treatment available. It works by re-educating, toning and firming muscles and softening the appearance of fine lines and wrinkles. Your skin will be left with a wonderful glow and a firmer more supple appearance. During the first consultation, I will find out what you are looking for in a non-surgical face lift and explain the treatment in detail.

After this treatment your face will look and feel lifted and toned. Obviously these effects will be prolonged if you choose to continue with a full course of treatments.
